

MISSION AND VALUES

1.1.1

Statement of our Wise Wonder Enrichment Philosophy

Wise Wonder Enrichment is on a mission to introduce children to the wonder of words and infuse young minds with a love of reading. As lifelong childhood educators, we know that an early introduction to books and reading provides the skills, confidence and motivation needed for children to master independent reading and handwriting. We also know that instilling a love of reading and books builds a strong foundation for future academic success.

At Wise Wonder, we understand that each child is unique and that different approaches are necessary during every stage of the learning process. We believe that every child has the potential to learn if given the right opportunity, and that our warm and nurturing environment helps foster a love of reading and learning.

The Wise Wonder team believes that all children have limitless potential and that they can reach new heights through the wonder of words. We care about each and every child that walks through our doors - and we want to do all that we can to help them succeed.
